★★★★★ **Great large format light table for the price.**

Reviewed in the United States on August 4, 2016

Size: A3. 3-level light | **Verified Purchase**

There are many versions of this product out there with all sorts of prices. This is probably a generic, made in china version of an LED light table but lets face it, its an LED light table. Why would I pay \$80 or more for that? This was about \$50 and I don't regret the choice. It's big, the light area is some 13 inches wide by just under 17". With three setting of light. It tends to work best in a darkened room, you don't want to have a light on the paper if you're trying to trace especially if you're using a thick paper. The does not have the most polished finish but feels sturdy and works perfectly. It comes with two power cables: a standards plug-in transformer and a usb cable (whose sole purpose is to power it, this item in no way works with a computer- it is NOT a computer input device, though a computer could power it). The great thing about the usb cable is that you can power this using a power bank making it totally portable. (see attached photo)

★★★★★ **Great for appliqué and paper piecing**

Reviewed in the United States on July 16, 2017

Size: A3. 3-level light | **Verified Purchase**

Initially I had planned to make my own light box, using instructions that I found on Pinterest. However, after calculating the costs, I found it is cheaper to buy one. I decided on this A3 light box because of the price, the large work space, the portability, and its wall adapter power supply. I have read that LED light boxes with USB power supplies tend to flicker, especially at the bright illumination level.

There are three levels of illumination in this light box; I primarily use the lowest level because the other two levels are a little too bright for me. This light box is the right size to take to class and is thin and light.

Tracing appliqué shapes from paper patterns is a breeze; wonderful for tracing the back side of paper pieces when paper piecing. Highly recommended.

The light box came two days after I ordered it on Amazon, even though the order stated three to four days. Great service from the seller. Thank you!

★★★★★ **VERY MUCH WORTH THE PRICE!!!**

Reviewed in the United States on October 5, 2019

Size: A2 | **Verified Purchase**

1st picture is my old board in the middle of this new board.

2nd picture is a project I am currently working on.

3rd picture is a standard 12 inch ruler in the middle of the board.

I am in LOVE with this light board!!! First of all its HUGE!! I use it for my Diamond Paintings & put even the largest picture on it & not have to move the picture around to light the section working on. It has 3 levels of brightness & so far 2 has been bright enough!! One of my biggest problems with the previous board was not only was it VERY small, the power switch was so EXTREMELY sensitive that just brushing over it caused the board to power off. This board is so that A, that is not a problem & B, the switch is NOT that sensitive. I also love that this board has an AC/DC PLUG IN adapter & not a USB adapter. My old board developed a shortage at the connection site & eventually stopped working all together after only having it for 4 months. This board is much heavier than my old board but I don't mind AT ALL because it is 3-4x's bigger! It comes with a tote bag to carry it, but I have also made a padded cover for it for extra protection.

★★★★★ **Impressive, great price.**

Reviewed in the United States on January 4, 2019

Size: A2 | **Verified Purchase**

I own a smaller light box that's been very reliable for me for some time now, so I returned to the seller when my son requested a much larger version. This one works and looks exactly as advertised, and at the brighter settings, it can go through very heavy paper and still provide enough light to trace with. He's very pleased and loves how well it works. If you've hit places like Hobby Lobby or Michael's and looked at the light boxes they sell, then you also know what to sell them for. This one was way better looking, incredibly larger, and FAR, FAR, less expensive. However, do buy the Asurion insurance for this one. Unlike my smaller A4, this A2 would be a much more expensive item to replace if the need ever arose. A mere \$3.50 too insure this purchase. Money well spent in my opinion. Highly recommended.

★★★★★ **You get the most bang for the buck. I would not get any lightbox smaller than**

this.

Reviewed in the United States on May 21, 2017

Size: A3. 3-level light | [Verified Purchase](#)

EXCELLENT. Get the bigger view area this one has. It also comes with a wall plug adaptor and a bag cover. VERY happy with what I got as the viewing area is larger than most of what is offered and it gets very bright. Don't spend less and get a smaller size and one that does not have an adaptor option.

★★★★★ **Serves its purpose with no trouble!**

Reviewed in the United States on July 30, 2018

Size: A3 | [Verified Purchase](#)

This light box tracer is perfect for my needs. I occasionally want to transfer an image from my sketchbook or my photos directly onto watercolor paper. With this product I can easily transfer a photo print or copy of sketch by tracing directly onto 140 lb paper by placing the watercolor paper on top of the scene to be traced and placing them both on the light box. Easily projects images through both sheets of paper. It is very thin, bright (three settings) and always sitting on my project table. I have used it now for three months.

★★★★★ **Great Light Board**

Reviewed in the United States on August 24, 2017

Size: A2 | [Verified Purchase](#)

Love this light board. The size is perfect for tracing my Quilting Applique Backgrounds. I also use it for tracing the designs onto freezer paper to prep my appliques. The flat surface makes it very comfortable to work on. I also like being able to choose the light intensity.

★★★★☆ **One minor issue....**

Reviewed in the United States on December 26, 2016

Size: A3. 3-level light | [Verified Purchase](#)

It's a really nice light board that didn't cost an arm and a leg. Good size, too. My only gripe is when I turn it to the brightest setting, it just flashes off and on, and I have to unplug it. Fortunately, I've only needed to use the lowest and medium settings for my projects. For these reasons, I cannot give 4 stars.

★★★★★ **Works great for diamond painting**

Reviewed in Canada on August 16, 2018

Size: A2 | [Verified Purchase](#)

I've only had it for a day but so far I love it. It's huge which is something I really wanted beca
I'm using it to do my diamond paintings on. It's really bright and u can clearly see threw the
on all three brightness levels. Seems to be very well made and not a cheeply manufactured
product. All around good light pad, very pleased with this purchase so far.

★★★★☆ **Super Helpful**

Reviewed in Canada on September 11, 2019

Size: A2 | [Verified Purchase](#)

I'm to gonna lie, I kinda doubted this product. When I first got it I couldn't get it to turn on u
my husband came and tapped a bit higher then the power icon. Other than that minor
misplacement this is exactly what I needed. It has different settings for brightness so if the p
isn't thick you don't have to kill your eyes with a insanely bright light. It's a perfect size to do
drawings and the clip it comes with is also super helpful. If you draw enough this is super he
making crisp clean final copies. I didn't realize how much I needed this product until I got it,
would recommend it over and over. If I could do half stars I would give it a 4.5 but only beca
the misplacement of the power icon, but it could just be the one I got. Overall so epic!

★★★★★ **The size is great.**

Reviewed in Canada on July 15, 2019

Size: A2 | [Verified Purchase](#)

I love it. I use it for diamond painting and mist of them fit on it with lots of room left over. I
smaller cheaper version and I had to wrap my project around it. It was not good when doing
last half. I dont have that problem now. I can also clip my magnifine glass to which ever side
it. It's great you won't be disappointed.

★★★★☆ **transport**

Reviewed in Canada on June 9, 2019

Size: A2 | [Verified Purchase](#)

Je suis content de mon achat. Le contacte pour les différentes forces lumineuses ne fonction

par contre toujours bien.

Pour le transport c'est problématique. Vous devriez faire affaire avec UPS plutôt que Purolet premier a plusieurs point de dépôt de colis tandis que le second en a qu'un à Québec, qui n'est pas facile d'accès.

merci à vous
