Provided details::

We have updated all of our equipment and tools in the automotive department. The automotive technology field is rapidly growing and changing. We need to have our department facilities match our high level of instruction and equipment. The paint looks like it was from the 1990's or earlier. Expensive equipment and tools are out in the shop and we need cameras to monitor for theft. We had a situation over the break where people broke into the vehicle storage area and stole a catalytic converter. We would like to have the automotive department match the rest of the school in aesthetics as well. Thank you.
