Q7

Estimated Cost:

$22,000

Q8   **Respondent skipped this question**

Please attach quote, if available

Q9

Total Cost of Ownership:Your requested item may incur ongoing expenses. Please consider any and all costs associated with your requested item.What are the ongoing expenses associated with your request? If there are ongoing expenses, please detail how you plan to support these costs with your existing budget. Examples include yearly service agreements, warranties, 5-year replacement costs, maintenance, upgrades, and impacts to staffing, etc.

Student-Centered, Skills-Based Learning Environments are more efficient because they utilize more of the built area for teaching and learning by reducing the amount of space dedicated to circulation and utilities. Almost 15 percent more space can be captured in this manner for education. Conversely, new and renovated facilities can make do with up to 15 percent less area than they might otherwise have.

Student-Centered, Skills-Based Learning Environments are generally less likely to suffer damage due to vandalism, because students have a greater sense of ownership of the school. This reduces the cost of ongoing maintenance.

Q10

Justification of Request:The justification of the request is a key area to focus on. The ROC encourages you to strengthen your request by providing a robust rationale detailing all relevant criteria. When writing the rationale, keep in mind that those reviewing the justification may not be familiar with your department and needs. Providing detailed information and context can help clarify the need for your request.Please select the applicable criteria(s) and provide the details of how the criteria(s) relate to your request.

Program expansion,

Impact on student success and access,

Innovation,

Equity and Antiracism,

Provided details::

The learning environment will look very different from the content-focused classrooms of the past. From a design standpoint, it means accommodating more opportunities for hands-on learning throughout the classrooms. The school's connection to the environment, the community, and the global network is important if not critical to the delivery of equitable access for all students experiencing a twenty-first-century education.

Q11

Program Goal:Please identify the program goal(s), as stated in your current annual or comprehensive program review, that this request would help your program achieve. Provide a brief explanation of how it would do so.

The main purpose of student-centered, skills-based learning environment is to make learning more personalized for every student. Design principles for classrooms are meant to evolve, not only to become more agile, but to also embrace the ideology and philosophy of the industry that we are preparing our students for.

We are creating an innovative classroom learning environment to match a new generation of users. In turn, it influences how our students behave and perform. That can be achieved by improving the learning environment both philosophically and physically.
