

MATH 160+60 STUDENT SUPPORT

Does your Statistics instructor use the OLI materials on Canvas?

If so, then they are one of a group of teachers using the same materials with a similar class structure. If you ever need help or have any questions, but cannot make your teacher's Student or Office Hours ... then we want you to know that you have options! Along the right side check-out the days and times where you can get help in two different ways here in the STEM Center.

1.

Work with another instructor teaching your course who is familiar with your Workbook, Math Interludes, Canvas Readings, Quizzes, Discussions, and Labs!

2.

For a mini classroom vibe, join students from other Stat classes like yours, or bring a group from your class to get group tutoring! There is no need to struggle on your own when you can have fun figuring things out together with a tutor to help guide you.
