How To Use Export Clip List

The Export Clip List feature allows you to print out and save an Excel spreadsheet with clip information.

1. On the Search Center page, use Browse or Keyword Search to find clips for your course.

2. Click on the Export Clip List button to launch a pop-up window with an Excel spreadsheet that contains information for the clips you have identified.

Tip: Use Export Clip List to review clip information offline or to make course content recommendations to instructional designers.
