

CUYAMACA COLLEGE
COURSE OUTLINE OF RECORD

AUTOMOTIVE TECHNOLOGY 194L – DIESEL ENGINE PERFORMANCE AND DIAGNOSIS LABORATORY

3 hours laboratory, 1 unit

Catalog Description

This laboratory course describes and demonstrates proper inspection and diagnostic techniques for various diesel engine performance symptoms and conditions, including fuel systems operations. This course is the laboratory practice opportunity for students taking courses AUTO 194 Diesel Engine Performance and Diagnosis lecture, and Diesel Engine Performance and Diagnosis Assessment Test Out, and/or for students taking a Work Experience course who need additional instruction and practice completing required ASE competencies and tasks.

Prerequisite

None

Course Content

- 1) Department Safety Test
- 2) Written examination
- 3) Hands on tests using actual training vehicles and test equipment in the department laboratory
- 4) Hands on tests using distance education technologies
- 5) Hands on tests using virtual reality or mobile technologies

Course Objectives

Students will be able to:

- 1) Demonstrate standardized safety and hazardous waste handling practices.
- 2) Successfully navigate manufacture specific repair information for appropriate repairs of diesel engines.
- 3) Demonstrate the fundamentals of diesel engine theory and operations.
- 4) Demonstrate knowledge of various diesel engine components and apply the appropriate repairs.
- 5) Demonstrate the ability to perform mechanical diesel engine performance tests.
- 6) Demonstrate the ability to perform engine performance tests using scan tools.
- 7) Proficiently document failure analysis for warranty and customer pay services.
- 8) Demonstrate actions to repair diesel engine performance systems.
- 9) Demonstrate the ability to diagnose and repair diesel fuel management systems.
- 10) Demonstrate the ability to diagnose and repair exhaust and intake air systems.
- 11) Demonstrate the ability to use codes and symptoms to follow pinpoint tests to diagnose related DTC's.
- 12) Test high-pressure oil system tests and understand the operation of various common rail engines and designs.

Method of Evaluation

A grading system will be established by the instructor and implemented uniformly. Grades will be based on demonstrated proficiency in subject matter determined by multiple measurements for evaluation, one of which must be essay exams, and skills demonstration.

- 1) Skills-based summative assessment that measures students' ability to successfully complete the necessary ASE tasks related to diagnosis, replacement, repair, testing of automotive diesel engine systems.

- 2) Practical exercises that measure students' progress toward mastering tasks related to diagnosis, replacement, repair, testing of diesel engine systems.
- 3) Student portfolio of competencies record book will contain student artifacts.
- 4) Web based training modules.
- 5) Performance projects.

Special Materials Required of Student

- 1) Approved safety glasses
- 2) High speed internet connection
- 3) Students will have access to testing tools and equipment while on campus and by remote assistance software
- 4) Safe and appropriate dress code is required while in the lab on campus.

Minimum Instructional Facilities

- 1) Auto tech lab (20 service bays)
- 2) Various training vehicles
- 3) Smart classroom
- 4) Diagnostic tools and equipment

Method of Instruction

- 1) Demonstration
- 2) Individual assistance
- 3) Feedback of repair processes regardless of successful or unsuccessful

Out-of-Class Assignments

- 1) Reading assignments
- 2) Writing assignments
- 3) All web based training must be completed prior to "Test Out"
- 4) Student must pass online pretests prior to laboratory tests

Texts and References

- 1) Required (representative examples):
 - a. Student workbooks – will be provided electronically.
 - b. Required:-CDX Light Vehicle Diesel Engines, 2019, **ISBN: 9781284196696**
 - c. Web Based Training Modules will be provided electronically.
 - d. Workshop Manuals will be provided electronically.
- 2) Supplemental: None

Student Learning Outcomes

Upon successful completion of this course, students will be able to:

- 1) Accurately describe various conditions of diesel engine performance fuel and exhaust systems.
- 2) Diagnose diesel engine performance fuel system problems by navigating the workshop manual based on symptoms or codes.
- 3) Communicate effectively and professionally in a diverse setting that includes prospective colleagues, clients, and supervisors.
- 4) Comply with environmental health and safety regulations at the state and federal levels.
