# Outcomes & Assessment Overview

## Cuyamaca Mission, Vision, & Values

**Mission:** Cuyamaca College advances equity and social justice through student-centered and innovative approaches to education. We strive to create unique and meaningful learning experiences that build upon the strengths and socio-cultural experiences of our diverse student population and the communities we serve by providing programs that lead to certificates, degrees, transfer, career opportunities, and ultimately social and economic mobility.

**Vision:** Equity, Excellence, and Social Justice through Education

**Values:**

- Student-centered
- Equity
- Student Success
- Innovation
- Excellence
- Social Justice
- Community

## Cuyamaca Strategic Plan 2022-2028

Cuyamaca College structures its planning processes and engages the college community by pursuing the following priorities, which form the foundation of the 2022-2028 Strategic Plan:

- Increase equitable access
- Eliminate equity gaps in course success
- Increase persistence and eliminate equity gaps
- Increase completion and eliminate equity gaps
- Increase hiring and retention of diverse employees to reflect the students and communities we serve

## Outcomes & Assessment Committee (OAC) Charge & Composition

### **Charge:**

The Committee is charged with advancing a culture of assessment across the college, and with supporting the use of assessment data in continuous improvement processes at the course, program, service area, and institutional levels. To accomplish this, the committee is responsible for the following:

1. Maintain outcomes assessment schedules for all instructional programs and student service areas
2. Inform faculty leaders and relevant administrators of outcomes assessment needs by instructional program and/or service area
3. Follow up with faculty to ensure on-time and thorough completion of outcomes assessment, including the dialogue and follow up processes
4. Create and maintain institutional processes for efficient and useful outcomes assessment
5. Manage collection and input of learning outcomes data into the campus management system
6. Facilitate communication about outcomes assessment data to faculty and the campus community as a whole
7. Consult with faculty members and service area leaders about all aspects of learning outcomes and assessment, from the creation of outcomes statements, to successful practices for assessment
8. Host professional development opportunities about outcomes and assessment at the department, service area and college-wide levels
9. Develop and pilot innovative practices in learning outcomes assessment
10. Support the incorporation of student experience, input and voice in outcomes assessment

Committee members will be responsible for staying up-to-date with the status of outcomes assessment in their designated instructional or service area. Committee member liaisons will specifically manage communication and support with faculty and service area leaders to support on-time assessment. Overall, the committee serves as a channel for communication, planning, institutional dialogue regarding continuous quality improvement, and coordination of assessment activities between departments and organizational units of Student Services, Instruction and Administrative Services. The Outcomes and Assessment Committee is a sub-committee of the Academic Senate,

and will regularly work with Academic Senate, the Program Review Steering Committee, and the Institutional Effectiveness Council.

**Meeting Schedule:**

Monthly, second Monday of the month, 3:00-4:00 p.m.

**Chair(s):**

Sr. Dean, Institutional Effectiveness, Success, and Equity/Accreditation Liaison Officer  
SLO Coordinator

**Composition:**

- 2 Instructional Faculty Representatives from MSE
- 2 Instructional Faculty Representatives from AHSS
- 1 Instructional Faculty Representative from CE
- 1 Instructional Faculty Representative AKHE
- 1 Counseling Faculty Representative from Student Services
- 1 Representative from LTR
- 1 Representative from Student Services (Administrative)
- 1 Classified Staff Representative
- 1 Student Representative

\*Note: at least one of the above faculty representatives should be certified to teach online

**Resources:**

Office of Institutional Effectiveness, Research & Planning Specialist  
TracDat Coordinator  
Accreditation Co-Chair  
Articulation Officer

## Why Do We Assess Outcomes?

Instructional programs and courses, service area departments, administrative units, and the college as a whole all establish outcomes that reflect their goals. On the instructional side, outcomes articulate the most significant skills that students gain from their courses and programs of study—students should be able to identify those skills and reflect on them throughout their educational journeys. Additionally, outcomes can help clarify and direct course and program improvements. In service areas, outcomes can articulate the most significant work of the department or program in the interest of student success and equity. Outcomes should reflect the most pressing, goal-oriented work of all areas of the college.

We assess outcomes to find out if what we are doing is achieving the results we expect, to inform and focus improvements to our instruction and services, and to align our work with the mission, vision, and values of the institution. Reflective practices around assessment, such as the development of equitable and innovative assessments of student learning, collective assessment practices, project-based assessment, and work with disaggregated program data are all potentially powerful ways to grow as a college and as a community. Ideally, assessment results can be used to design pathways for course and program improvement, student success, and equitable outcomes.

Data driven assessment and reflection is the way the Accrediting Commission for Community and Junior Colleges (ACCJC) requires schools to make improvements to their programs.

### ACCJC Standards met by Outcomes Assessment:

- **Standard 1.B.1 :** The institution demonstrates a sustained, substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.
- **Standard 1.B.5 :** The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.
- **Standard 1.B.6 :** The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or

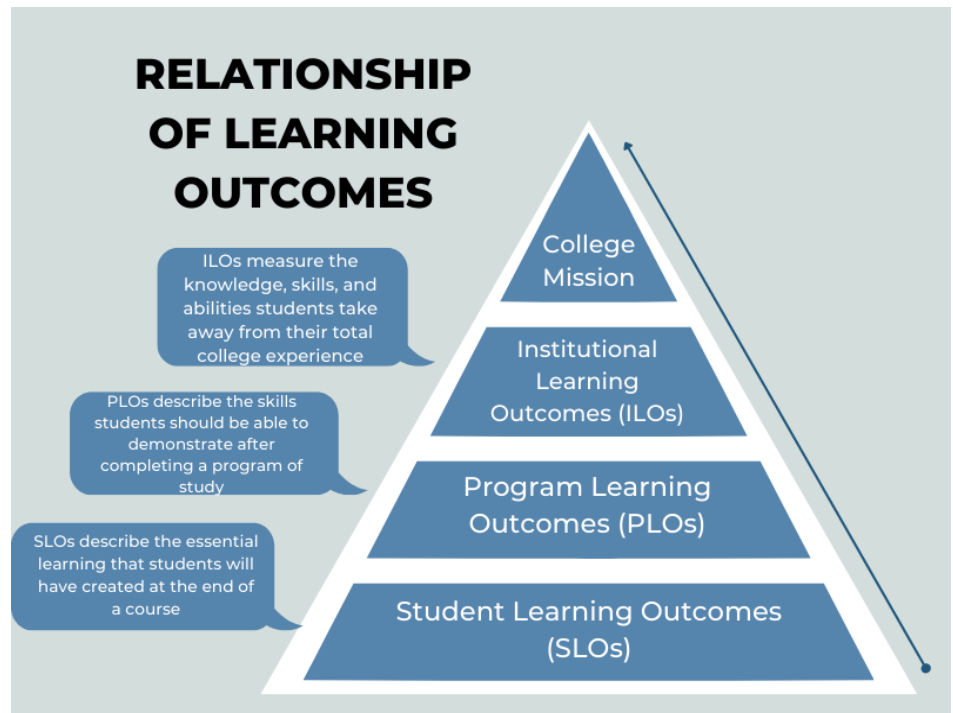

reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.

## Relationships Between Outcomes

### Instruction: SLOs, PLOs, and ILOs

- Student Learning Outcomes (SLOs) exist at the course level and describe the essential learning that students will have created at the end of each course.
  - SLOs should link to the Program Learning Outcomes for courses within a specific program or across an Academic & Career Pathway (ACP).
- Program Learning Outcomes (PLOs) describe the skills students should be able to demonstrate after completing a degree or certificate. Over the last few years, we have initiated PLOs by ACP, wherein ACPs are encouraged to share some or all PLO statements.
  - PLOs should link to the Institutional Learning Outcomes for Cuyamaca College.
- Institutional Learning Outcomes (ILOs) measure the knowledge, skills, and abilities students take away from their total college experience.
  - ILOs should support the Cuyamaca College mission, vision, and values.

The diagram shows how learning outcomes at all levels correspond to and support the College Mission. Course SLOs are most numerous and are the foundation upon which the various PLOs are built; both contribute to and reinforce the Institutional Learning Outcomes which support the mission of the college.

## Student and Instructional Services: SLOs/SAOs, Program Review, and ILOs.

Student and Instructional Services areas are welcome to develop and assess SLOs or SAOs, or a combination of both.

- Student Learning Outcomes (SLOs) describe what a student will know or be able to do after interacting with your service or course.
- Service Area Outcomes (SAOs) describe what your service area will do in the interest of supporting student success and equity.
  - Ideally, SLOs and SAOs should constitute assessable steps toward achieving the goals from each area's annual and comprehensive program reviews and should map to the college's ILOs.

## Who to contact for support?

### **Need support with writing or creating an assessment plans for your course SLOs?**

Contact: Tania N. Jabour  
English Instructor and SLOA Co-Coordinator  
[Tania.Jabour@gcccd.edu](mailto:Tania.Jabour@gcccd.edu)

Rachel Polakoski  
Math Instructor and SLOA Co-Coordinator  
[Rachel.Polakoski@gcccd.edu](mailto:Rachel.Polakoski@gcccd.edu)

### **Need support with Nuventive Improve (Formerly TracDat)?**

Contact: Heyley Troyer  
Institutional Effectiveness Specialist and Tracdat Administrator  
(619) 660-4579  
[heyley.troyer@gcccd.edu](mailto:heyley.troyer@gcccd.edu)

### **Need support with submitting SLO data or developing an assessment plan?**

Contact: Your department's [Faculty Liaison](#)

# Institutional Learning Outcomes (ILOs)

## What is an Institutional Learning Outcome (ILO)?

Institutional Learning Outcomes (ILOs) articulate the competencies that students develop over their entire experience at the college, including in their courses, during their programs of study, and through interactions with instructional and/or student services. At the broadest level, they measure the knowledge, skills, and abilities that students take away from their total college experience.

ILOs should be derived from and reflect the mission, vision, and goals of the college, and they should have a role in advancing the college's strategic plan. Course-level and service area-specific student learning outcomes, program learning outcomes, and service area outcomes all map up to ILOs.

## Cuyamaca College Institutional Learning Outcomes

(Approved by the Academic Senate and College Council in Spring 2019)

Students who complete a program of study leading to an associate degree or Certificate of Achievement are expected to achieve the following Institutional Learning Outcomes (ILOs). (Reference: ACCJC Standard II.A.11)

1. **Communication Competency:** Students will communicate information, arguments and opinions effectively to different audiences, through various modalities, including listening, speaking and writing.
2. **Critical Thinking Competency:** Students will analyze and evaluate qualitative and quantitative information, and synthesize findings to make decisions within various contexts.
3. **Cultural Competency:** Students will interact effectively with others, taking into account their diverse backgrounds, and work well in cross-cultural situations.
4. **Professional Responsibility:** Students will practice ethical and civil conduct in professional environments, as well as resolve conflicts and build alliances.

## Assessment of ILOs

Cuyamaca College assesses ILOs two ways, through indirect, qualitative assessment, and through interdisciplinary direct assessment.

**Indirect Assessment:** From (insert years), Cuyamaca College surveyed graduating students about their learning experiences throughout their time at the college. The survey asked students to self-report their skill levels corresponding to the college's ILOs on a Likert scale and offered them the opportunity to answer open-ended questions about their challenges and successes at the college. The responses to the open-ended questions yielded valuable insights about student experiences, which the college incorporated into institution-wide planning meetings.

**Direct Assessment:** Through the 2019-2021 Institutional Effectiveness Partnership Initiative (IEPI) dedicated to innovations in outcomes and assessment, from the guidance of the Partnership Resource Team (PRT) and with the support of the IEPI grant funding, the college was able to pilot a direct assessment project for ILOs. In fall 2020, the Student Learning Outcomes Coordinator recruited an interdisciplinary team of faculty to develop the project, create and administer the assessments, analyze the findings, and report on both the assessment results and on the project itself, in the interest of eventually scaling and institutionalizing this pilot.

The direct assessment of ILO #1: Communication Competency was completed in the spring 2021 semester among 151 students across classes in a variety of academic disciplines. The results of the assessment are noteworthy for several reasons, one of which is that there appeared to be no equity gaps in scores when we disaggregated the assessment results by race/ethnicity and gender. The college hopes to scale the project in future semesters to directly assess other ILOs, and particularly to build upon the findings of the initial project to further the practice of inclusive and equitable assessments college-wide.

# Instructional Outcomes & Assessment

## Student Learning Outcomes (SLOs)

### What is a Student Learning Outcome (SLO)?

SLO statements describe significant and essential learning that students will have created, and can reliably demonstrate mastery of at the conclusion of a course or program.

Student Learning Outcomes should hit certain criteria:

- SLOs need to be expressed using active verbs.
- SLOs are linked to Program Learning Outcomes which are linked to the Institution's Strategic Plan
- SLOs need to be measurable
- SLOs state a core skill, ability, attribute or knowledge that can be generalized across multiple courses and linked to use in a future career.

A Student Learning Outcome is not a course objective. The difference between a Student Learning Outcome and a course objective is that an SLO is broad, where a course objective is specific. The course objective is the granular information and examples that can be combined to support a single student learning outcome. This is why courses are expected to have many objectives that are combined to only a few student learning outcomes.

## Faculty Liaison Model

Faculty liaisons are those members serving on the Outcomes & Assessment Committee (OAC). Faculty liaisons act as a resource and support person to ensure timely, meaningful assessment for their assigned departments. Each faculty liaison is paired with departments on campus and offers regular check-ins with department chairs to provide assistance in SLO planning and assessment. Faculty liaisons act as representatives for their assigned departments and share needs and other relevant feedback with OAC. To find out who is your faculty liaison, please consult the [faculty liaison grid](#).

## Sample Student Learning Outcomes (SLOs) Statements:

- (English) Synthesize material from multiple texts to create and support an argument in response to a prompt.
- (Ornamental Horticulture) Prune and plant young plants in conformance with current best horticultural practice.
- (Spanish) Compare and contrast theme-specific aspects of Hispanic/Latino culture to their own.
- (Math) Use analytical, numerical, and graphical methods to solve statistics problems.
- (Chemistry) Predict the effect of concentration, temperature or catalysts on the rate or equilibrium position of a chemical reaction.

## Assessment of Student Learning Outcomes

### When do we assess SLOs?

Student Learning Outcomes are assessed on a cycle similar to that of the newly adopted Program Review cycle. Student Learning Outcomes need to be assessed at least once every four years and they can be done in separate semesters to ease the workload needed to properly assess each course. The chair of each department should be setting up an assessment plan that accounts for assessing SLO for each course on the four year cycle, such as in the template below. It is also recommended that when a course is assessed, all SLOs for that course are assessed within the same semester.

To see when the courses for your department were last assessed, view the [Assessment Quick Guides](#).

### Instructional Assessment Plan Template

The following [Department SLO Assessment Plan & Student Outcomes Assessment Plan Template](#) can be used as an internal document to help plan your area's assessment cycle and can be submitted with your annual and/or comprehensive program reviews as supporting documentation.

## Department-Level SLO Assessment Plan

*The below template is a partial model and can be adjusted to reflect the course offerings of any department. It is highly recommended that instructors assess all SLOs in a course in an assessment semester. Another recommendation is to map the assessment schedule onto the comprehensive review cycle, and assess all courses between comprehensive reviews.*

Department: \_\_\_\_\_

Last Comprehensive Program Review: \_\_\_\_\_

Next Comprehensive Program Review: \_\_\_\_\_

Course	F22	SP23	F23	SP24	F24	SP25	F25	SP26
ENGL 120 (Comp)	X		X		X			
ENGL 124 (Adv Comp)		X		X		X		X
ENGL 221 (Brit Lit 1)	X				X			
ENGL 222 (Brit Lit 2)		X				X		
ENGL 231 (Am Lit 1)			X					
ENGL 232 (Am Lit 2)				X				X
ENGL 272** (World Lit 2)	Assess as able							
ENGL 217** (Fant/SciFi)	Assess as able							

\*In this model, the F25 semester is reserved for calculating PLO assessment results and reflecting on data for the next comprehensive program review.

\*\*These classes have a high likelihood of being cut due to low enrollment and should be assessed each time they are able to run.

## Course-Level SLO Assessment Plan

**Note: Repeat for each course!**

Course: \_\_\_\_\_

Student Learning Outcome Statement	Assessment Method or Tool	Mapped to PLO(s): (If Applicable)	Mapped to ILOs (if applicable)	Data Collection (Specify Semesters)
<b>Example:</b> ENGL 124 SLO 1: Analyze the arguments and underlying assumptions in complex and nontraditional texts, explaining the relationships between arguments and the ways writers advance their claims.	Rhetorical Analysis Essay Unit	PLO 2: Apply discipline-specific theories about language and communication to students' own practice or work.	ILO 1: Communication Competency and  ILO 2: Critical Thinking Competency.	Spring 2023, 2024, and 2025
SLO 1: Write outcome statement here.				
SLO 2: Write outcome statement here.				
SLO 3: Write outcome statement here.				

### Communication Plan

For each outcome statement: How will you <b>communicate</b> outcomes assessment results to the larger group and <b>incorporate those results</b> into your department discussions, processes, and practices.	
SLO 1: Write outcome statement here.	Summarize communication and results/assessment incorporation plan here.
SLO 2: Write outcome statement here.	
SLO 3: Write outcome statement here.	

The Department SLO Assessment Plan is used to designate a timeline for all courses within the department to be assessed over a four year cycle. To create your assessment plan using this model, take the following steps:

1. Adjust the timeline to map onto your comprehensive review cycle
2. List all of your active courses
3. Determine the best schedule to assess them over the course of four years, given the needs of your department.
4. Allow time for the reflection, follow-up and implementation pieces as you use the SLO data to make course level and programmatic adjustments.

The Student Outcomes Assessment Plan is for each course within the department. This course-level planning template helps faculty who are teaching courses to be assessed determine assessment methods and identify SLO links to PLOs and Program Review Goals. A Communication Plan is also recommended.

## Different ways to Assess Learning Outcomes

Direct Assessments	Indirect Assessments
<ul style="list-style-type: none"> <li>● Essays</li> <li>● Exam Questions</li> <li>● Term Papers</li> <li>● Field work performance, internship performance or service learning projects</li> <li>● Research projects</li> <li>● Case study analysis</li> <li>● Oral Presentations</li> <li>● Performances</li> <li>● Portfolios</li> <li>● Video Production</li> </ul>	<ul style="list-style-type: none"> <li>● Surveys</li> <li>● External Reviewers</li> <li>● Licensure exam results</li> <li>● Student Exit Interview/Surveys</li> </ul>

## Using Canvas Outcomes to Assess SLOs

The Canvas Outcomes feature offers an efficient way for faculty to assess and collect course-specific data for Student Learning Outcomes. Benefits include real-time data collection during grading in Canvas, automatic charts and reports, and ease of sharing SLO assessments with other faculty in the same department.

To get started, the course SLOs will need to be uploaded to your Canvas container. It is recommended that SLOs are added at the program level to ensure consistency across courses. Please contact the SLO Co-Coordinators to get your course SLOs prepared for your Canvas container.

Once the SLOs are added to Canvas Outcomes, faculty can easily assess SLOs by adding SLO statements to grading rubrics. SLOs can also be assessed using the “New Quiz” feature in Canvas. Faculty can align an SLO to an entire quiz or individual questions. Outcome assessment results can be viewed using the Learning Mastery gradebook in Canvas.

### **Resources for Using the Canvas Outcomes Feature to Assess SLOs:**

- [Faculty How To's for Setting Up SLOs on Canvas](#)

- Canvas Video Guide: [Outcomes Overview \(Instructors\) from Instructure](#)
- Canvas Guide: [How do I use the Learning Mastery Gradebook to view outcome results in a course?](#)
- Helpful Website: [Kansas State University Canvas SLO Assessment Quick Guides](#)

## **Equity in Instructional Assessment**

A timed exam in a STEM class or a proctored writing prompt in a language class only allows students one way to share their knowledge and the time constraint on such forms of assessment often adds undue stress in a strictly academic setting - how often will students be asked to recall knowledge in the workplace under such time constraints and without any resources? Faculty are encouraged to look beyond traditional assessment methods for their discipline and be innovative in their methods for assessing student learning.

If assessment is about demonstrating learning, then faculty should allow students the space to show their knowledge. Students are highly varied in customs, identity, and understanding, and it is all shaped by culture which affects learning. Faculty have the opportunity to create meaningful, equity-minded, culturally responsive assessments of student learning.

### **Why Equitable Grading?**

Traditional grading originated in the late 1700s to efficiently move large numbers of students through the system, most of whom identified as White, middle-to-upper class males. Despite the

change in student demographics and the community college mission, the traditional grading system has largely remained intact. Consequently, grades have disproportionately harmed historically underrepresented students, as they invite implicit bias, rely on a subjective definition of merit, and lead to an increase in stress and decrease in motivation, which can lead to disengagement and disempowerment for the most vulnerable students (Edwards & Edwards, 1999; Hartmann, 2012; Hiller & Hietapelto, 2001; Inoue, 2004; Janzow & Eison, 1990; Zarzeski, 1998).

Conversely, by adopting equitable grading strategies, the data show a reduction in equity gaps for Black, Latinx, and Middle Eastern students. Qualitatively, students expressed appreciation for clear expectations and feedback, felt validated because they didn't fear failure, felt more confident and safer in the classroom environment, experienced a heightened sense of motivation, engagement, and classroom community, and expressed a shift in motivation from external (i.e. grades) to internal (i.e. writing improvement) (Kuhn, 2020). Inherent in equitable grading is the notion that the act of grading is a form of power; therefore, sharing power in the classroom by equitizing grading can contribute to a decolonized classroom space resulting in a reduction in equity gaps.

## Equitable Grading Strategies

There are many ways to incorporate elements of equitable grading. When doing so, it is helpful to consider who may be privileged or harmed by the more traditional grading policies or practices (i.e., who is impacted most by an inflexible late policy?). By asking these questions, it may shed light on which policies or practices may be updated. Some approaches that faculty may take to equitize their grading practices include:

- Adopting a flexible late work policy
- Adopting a revision policy wherein students can resubmit work for additional points or feedback
  - Helpful Canvas Guides:
    - [Changing the status of a submission](#)
    - [Reassigning an assignment](#)
    - [Quiz Settings](#)
    - [How to Drop the Lowest Score in a Group](#)
- Maintaining flexibility for students who learn at different speeds or in different ways
- Fostering a supporting, non-competitive community
- Putting an emphasis on feedback
- Allowing space for student voice and choice in the curriculum
- Allowing space for student voice in their grade. See this [great example of student self-assessment](#).
- Aligning assessments to student learning outcomes
- Leveraging peer review activities. Here is [a great article on calibrated peer review](#).
  - Canvas Guides:

- [Create a peer review assignment](#)
- [Instructor guide for using peer reviews](#)
- [Instructor guide for seeing peer review work by students](#)
- [Student guide for submitting a peer review](#)
- [Student guide for using the annotations feature](#)

## Equitable Grading Systems

In addition to the strategies above, there are also a variety of system-wide approaches to equitable grading, (most of which include the strategies above) including:

- **Contract Grading:** students select the grade they hope to earn in the class and follow the path set out by the instructor in order to earn that grade.
  - Grading Contract Examples:
    - [Black Literature](#) by Bri Brown from Cuyamaca College
    - Contracts from multiple [English classes at the CCC](#) from a presentation at the 2018 Student Success Conference
    - [Contracts from three different classes](#) from SUNY Cortland
    - [Technologies of Text class contract](#) with Ryan Cordell. They also wrote a great article on their process with more details titled "[How I Contract Grade](#)"
    - [21st Century Literacies class contract](#) with Cathy Davidson from Crowdsourcing Ungrading. The contracts are at the very bottom of the article.
    - [Introduction to Biology](#) by Melody Schmid from Butte College
    - [An example of a grading contract](#) can be found here.
    - [English: Advanced Composition](#) with Bri Brown from Cuyamaca College
- **Specifications Grading:** [C]ourse grades are based on the bundles of assignments and tests that students complete at a pass/satisfactory level. Bundles that require more work, more challenging work, or both earn students higher grades. No more points to painstakingly allocate and haggle over with students. By choosing the bundle they want to complete, students select the final grade they want to earn, taking into account their motivation, time available, grade point needs and commitment." - Linda B. Nilson from [Inside Higher Ed](#)
  - [Linda Nilson explains Specifications Grading](#) in detail
  - [Example Specifications Grading Syllabus](#) by Michelle Pacansky-Brock
- **Labor-based Grading:** focuses on learning as an iterative process and assumes that gaining new skills requires practice. In a labor-based contract, grades are determined by the amount of work students complete rather than evaluation of that work. In this process, the instructor provides feedback on assignments and students are asked to revise based on the feedback. It is this process of revision and improvement that determines a student's final grade. By focusing students on the revision process, we allow them to make mistakes without penalty. This willingness to try (and fail) is essential

to the learning process. Because the student's focus is on the work of revision (rather than the grade), they are able to focus more directly on the feedback provided by the instructor.

- [Asao Inoue explains labor-based grading](#) in detail
- [Example labor-based grading syllabus](#) by Asao Inoue
- **Ungrading:** Ungrading, by definition, isn't a rigid set of protocols. It is a form of grading that is flexible enough to meet the needs of the students, the instructor, and the course.
  - [Request Susan Blum's video detailing Ungrading](#)
  - [Jesse Stommel's Ungrading Syllabus](#)
  - [Setting up grading schemes in your course](#)
  - [Bri Brown's Black Literature Ungrading Syllabus](#)
  - [Susan Blum's Ungrading book](#)

**Culturally responsive assessment** is:

- mindful of the student populations the institution serves,
- using language that is appropriate for all students when developing learning outcomes,
- acknowledging students' differences in the planning phases of an assessment effort,
- developing and/or using assessment tools that are appropriate for different students, and
- being intentional in using assessment results to improve learning for all students.

Resources for Equity in Instructional Assessment:

- [Equity and Assessment: Moving Towards Culturally Responsive Assessment](#)
- [Practicing Equity-Centered Assessment](#)
- [Increasing Awareness and Reducing Harm: A Framework for Equity-Minded and Equity-Centered Assessment](#)
- [Equitizing a Grading System Worksheet](#)
- [Implementing Equitable Grading in Canvas Checklist](#)
- [Mixed Methods Dissertation Study on contract grading](#)

## How to Submit SLO Data

Complete the [Student Learning Outcome Assessment Entry Form](#) to submit SLO data. SLO data can be submitted at any time. However, it is recommended for faculty to submit SLO data at the end of the semester coinciding with the grade deadline. This ensures timely reporting of data.

# Program Learning Outcomes (PLOs)

## What is a Program Learning Outcome (PLO)?

PLOs are short statements that describe the knowledge, skills, values, and habits of mind that students completing a given program should be able to demonstrate upon graduation. PLOs can address a range of types of knowledge and skills, including cognitive (knowledge or mental skills), psychomotor (physical/motor and kinesthetic skills and knowledge), affective (feelings and attitudes), and interpersonal/social (interpersonal and social abilities).

Ask yourself the following questions when developing program learning outcomes:

- What do we want students in our program to know?
- What do we want students to be able to do?
- Are the outcomes observable, measureable, and can they be performed by students?

## PLOs by Academic & Career Pathways (ACP)

Academic and Career Pathways (ACPs) are collections of majors with related courses that fit within a career area. ACPs help guide students toward fulfilling careers through academic programs and integrated experiences and support services.

Cuyamaca College has eight ACPs:

- Behavior & Social Science
- Business & Professional Studies
- Culture, People, & Ideas
- Environmental & Applied Technology
- Health Sciences
- Language & Communication
- STEM
- Visual & Performing Arts

ACPs are encouraged to create shared Program Learning Outcomes (PLOs). It's possible for programs to retain program-specific PLOs and share PLOs across programs. Creating shared PLOs by ACP should clarify program outcomes for students

and ease assessment burdens for faculty. The examples below illustrate how the English department has three shared PLOs with the Language & Communication ACP, as well as two program-specific PLOs just for students earning a degree or certificate in English. Students earning a degree or certificate in English should meet all five PLOs (three shared and two program-specific). The ACP shares the responsibility of assessing the shared PLOs and the English department is responsible to assess the program-specific PLOs.

### Examples of Shared ACP Program Learning Outcomes:

#### Program Outcomes for Language & Communication:

After finishing any program in Language and Communication, students will be able to:

1. Communicate clearly and effectively in a variety of media and/or contexts.
2. Apply discipline-specific theories about language and communication to students' own practice or work.
3. Navigate norms related to communicating in diverse environments, including professional, intercultural, and/or specialized settings.

### Examples of Program-Specific Learning Outcomes:

#### Program Outcomes for English:

After finishing a degree or certificate in English, students will be able to:

1. Develop and support an original argument or interpretation with analysis of relevant evidence.
2. Analyze how authors use language and/or texts to illuminate, critique, and/or shape reality.

## Assessment of Program Learning Outcomes

### When do we assess PLOs?

The minimum requirement is to assess PLOs at least once within the institution set standard of 4 years. It is recommended that PLOs and SLOs be assessed using the Comprehensive Program Review cycle so that data can inform the program review.

## Different Ways to Assess

**Mapping:** One way to assess PLOs is by mapping SLOs in TracDat. For an example, see the [Language and Communication ACP program matrix map](#). When creating a map for your program, note that not every course-level SLO needs to map to a PLO. It is recommended that departments choose a few courses that every student in the program will take and identify relevant maps between SLOs and PLOs for those courses. Please note that if SLOs are updated, remapping to PLOs will be required.

**Direct Assessment:** If a program contains a sequence of courses that all students in the program must take, the department may conduct a direct assessment in a capstone course. For example, students earning a degree or certificate in Spanish are required to take and complete up through Spanish IV. Since all students must take Spanish IV in order to complete the program, the Spanish department may choose to offer a direct assessment during this course.

Direct assessments can take many forms, including but not limited to: questionnaires, portfolios, presentations, and performances.

## How to Submit PLO Assessment Data

If the department's SLOs are mapped to PLOs, the department does not need to submit PLO data. Mapped PLOs are assessed at the same time SLOs are assessed. Therefore, when the department submits SLO data, TracDat automatically generates PLO data.

If the department conducts a direct assessment of PLOs, data needs to be submitted on the [Program Learning Outcomes Assessment Entry Form](#). Note that this is only required for direct assessments of PLOs, not for mapped SLOs to PLOs.

# Resources for Writing Learning Outcomes

## Bloom's Taxonomy

Knowledge	Comprehension	Application	Analysis	Synthesis	Evaluation
cite	associate	administer	analyze	adapt	appraise
collect	classify	apply	arrange	assemble	argue

## Examples: Using the Best Action Verbs for Learning Outcomes

VERY HARD TO MEASURE	STILL TOO HARD TO MEASURE	RELATIVELY EASY TO MEASURE
<b>Students will be able to</b>	<b>Students will be able to</b>	<b>Students will be able to</b>
<i><b>appreciate</b> the benefits of exercise.</i>	<i><b>value</b> exercise as a stress reduction tool</i>	<i><b>explain</b> how exercise affects stress.</i>
<i><b>access</b> resources in the college library database.</i>	<i><b>recognize</b> problem solving skills that would enable one to adequately navigate through the proper resources within the college.</i>	<i><b>evaluate</b> the most appropriate resource that is pertinent to their college concern.</i>
<i><b>develop</b> problem-solving skills and conflict resolution.</i>	<i><b>understand</b> how to resolve personal conflicts and assist others in resolving conflicts.</i>	<i><b>demonstrate</b> to classmates how to resolve conflicts by helping them negotiate agreements.</i>
<i><b>have more confidence</b> in their abilities.</i>	<i><b>identify</b> critical thinking skills, such as problem solving as it relates to social issues.</i>	<i><b>demonstrate</b> the ability to analyze and respond to arguments about racial discrimination.</i>

# Curriculum & Learning Outcomes

All Course Outlines of Record (COR) undergo a curriculum review at least once every 5 years. Degree programs are reviewed and modified as needed. As part of the standard review process, faculty update learning outcomes to ensure they reflect the most current and significant outcomes of the course or program.

## Curriculum Processes

It is recommended that faculty who are making updates to Course Outlines of Record (COR) contact one of the Outcomes and Assessment Co-coordinators to discuss revisions and updates to outcomes statements before submitting the outlines for curriculum review. This enables consultation on drafts before the SLOs enter the curriculum process, which can save time for faculty.

Here is a description of how course SLOs move through curriculum on Course Outlines of Record (COR):

- When COR are submitted to the Dean of Curriculum and Instructional Operations for inclusion on the General Curriculum agenda, those outlines go through Technical Review first. In Tech Review, a small team of faculty and administration, including the Curriculum Faculty Chair, the Articulation Officer, and an Outcomes and Assessment Co-Coordinator, look closely at the draft of each COR to ensure that the outline meets technical requirements.
- If the Outcomes and Assessment Co-Coordinator has any questions or concerns about the SLOs on the COR, they will reach out via email to the faculty who submitted the outline with questions or suggestions for revision.
- Sometimes, the faculty member who submitted the COR makes adjustments to the outline based on feedback between the Technical Review and the appearance of the COR in General Curriculum. Sometimes, the outline moves forward for General Curriculum review without changes.
- SLOs are often discussed in the General Curriculum meeting in terms of the scope of the statement, how assessable the statement is, and how the statement connects to the Course Objectives and Course Content on the outline.
- After the COR move through the General Curriculum process as information items, they are approved at the subsequent curriculum meeting for inclusion in the Governing Board packet. That then goes to the Academic Senate for approval, and to the Governing Board meeting for final approval.

## Course Outline Updates and SLOs: Best Practices

The following “best practices” address some of the common issues that come up regarding SLOs in the curriculum process:

- The faculty chairs and coordinators who revise outlines aren’t always the faculty who are teaching the courses in question. One best practice is that chairs and coordinators (or whoever is doing the revision of the COR) work closely with the faculty who most often teach the course to determine what is actually happening in the course at the instructional level.
- It is recommended that the faculty who are revising an outline check on the assessment status of the course in question to see if that course is being assessed regularly. If not, there may be a barrier to assessment, such as outdated SLOs, confusing SLOs, too many SLOs, etc. If assessment isn’t happening regularly, sometimes that is an indication that the SLOs may need to be adjusted.
- SLOs should connect logically to the Course Content, Objectives, and Instructional and Assessment methods listed on the COR without duplicating that content.
- SLOs are meant to be changed as course content, objectives, assessments, and instructional practices evolve. Be sure that SLOs reflect the most significant, assessable, take-away skills from the class.
  - In other words, SLO statements answer the question, “what will a student be able to do upon successful completion of this course?”
- While it’s common that programs use patterns of SLO statements across courses, it is a best practice that SLOs reflect the discrete and specific learning outcomes for each course. SLOs should not be duplicated verbatim across separate courses, as those courses necessarily cover different content, objectives, and skills (or skill levels).
- If there are successful, innovative, student-centered, project-based, or real world assessments happening in the course, map the SLOs on to those!

## Student Services Outcomes and Assessment

Student services areas that conduct program reviews should maintain and assess outcomes specific to that department. Those outcome statements can take the form of Service Area Outcomes (SAOs) or Student Learning Outcomes (SLOs). Outcome statements for Student Service areas should connect to or reflect the broader goals of the department from the annual program review (maybe link to goals guidance here if there’s a resource from PRSC). The outcomes can reflect the concrete, assessable steps that the department will take to achieve the broader goal. Like all outcomes statements, SAOs and SLOs for Student Services should be specific, measurable, reflective of the current priorities of the department. We always

recommend that outcome statements be goal-oriented rather than an articulation of the standard, everyday work of the department.

## SLO and SAO Reference Guide

This reference sheet is designed to demonstrate the differences between Student Learning Outcomes (SLOs) and Service Area Outcomes (SAOs), offer samples, and support the creation of revised or new, meaningful outcomes statements.

### **SLOs: Student Learning Outcomes**

Describe what a student will know or be able to do after interacting with your service or course.

### **SAOs: Service Area Outcomes**

Describe what your service area will do in the interest of supporting student success and equity.

## Sample Outcomes Statements

Sample Student Learning Outcomes (SLOs)	Sample Service Area Outcomes (SAOs)
SLO (DSPS): Students can identify three ways to access/apply accommodations to support their academic success.	SAO (DSPS): Increase awareness about the value of DSPS programs and services among students and faculty.
SLO (Student Affairs): Students can apply lessons or take-aways from diversity-related programming to their own lives.	SAO (Student Affairs): Actively develop more diverse and robust student leadership through ASG and campus clubs.
SLO (Counseling): Students will evaluate their personal level of responsibility and motivation and make appropriate changes to support their college success.	SLO (Counseling): Facilitate comprehensive education plans for 70% of students within one year of enrollment.

## Revising Outcomes

- **Weak SLO (EOPS):** Students demonstrate knowledge about the benefits and services of EOPS.

- *Note: This outcome is overly broad: how will students demonstrate knowledge? What will be assessed?*
- **Revised SLO (EOPS):** 80% of eligible EOPS-enrolled students will complete and submit a FAFSA on time.
  - *Note: This outcome is more focused, specific, and measurable; it offers a tangible step toward supporting student success.*
- **Weak SAO (Student Health and Wellness):** Provide students with services to promote physical and emotional wellbeing.
  - *Note: This outcome just lists the most basic function of the service area; it is not assessable, focused, or innovative. We call this a “keeping the lights on” outcome and do not advise that programs adopt outcomes that simply articulate the standard, everyday work of the department or area.*
- **Revised SAO (Student Health and Wellness):** Create and provide innovative and effective stress-management services that address the specific needs of a diverse student community.
  - *Note: This revised outcome hones in on one aspect of the portfolio of health service offerings, with an implied intention to increase the innovativeness and effectiveness of that service, as well as the diversity of students who are accessing that service, all of which are measurable.*

## Creating Meaningful Outcome Statements - Student Services

In order to be meaningful, outcomes statements should be updated regularly. Ideally, updates to outcome statements happen every comprehensive program review, though departments can update their outcomes to coincide with the beginning or completion of major projects, leadership changes, or any other event that influences the goals and priorities of the service area.

Remember, in outcome statements, verbs matter! The action word you use in your outcome statement often dictates the scope and quality of the assessment. For example, an outcome statement that begins with the word “maintain,” suggests that there is no change or improvement required in that area. An outcome statement that includes the verb “increase,” often requires a pre-assessment and a post-assessment in order to determine whether there has been an increase. For SLOs, try to identify verbs that encourage higher-order skills among students, like analysis, synthesis, evaluation, application, and creation. Those skills often align best with the more complex, college-level, and professional work that we want to foster. For SAOs, try to identify verbs that are conducive to the type of assessment that the service area would like to complete.

### Meaningful SLOs:

- Are student-centered
- Use active verbs (the verb choice determines the assessment)

- ❑ Focus on learning resulting from an activity rather than the activity itself
- ❑ Target higher order, complex skills
- ❑ Are focused and measurable
- ❑ Indicate the most logical means of assessment in the outcomes statement
- ❑ Yield meaningful data for the department or program
- ❑ Reflect the institution's mission and the values it represents (ILOs can be a good foundation)
- ❑ Align at the divisional and institutional levels

### Meaningful SAOs:

- ❑ Focus on what the service area does or delivers and its quality
- ❑ May describe the efficiency and/or effectiveness of a service area
- ❑ Use active verbs (the verb choice determines the assessment)
- ❑ Focuses on a specific aspect of service where there is innovation, need for improvement, or need for assessment
- ❑ Yield meaningful data for the department or program
- ❑ Follow the SMART framework: Specific, Measurable, Attainable, Relevant and Time-Bound

## Student Services Outcome Statements and Cuyamaca College's Institutional Learning Outcomes (ILOs)

One best practice in Outcomes and Assessment for Student Service areas is to not only connect outcomes to the most recent/updated goals of the program review, but also connect outcomes statements to the college's Institutional Learning Outcomes. Outcome statements for Student Service areas articulate the measurable steps that service areas will take to achieve its own program review goals **and** support the Cuyamaca College's ILOs.

Cuyamaca College's ILOs articulate the broadest outcomes that the college fosters in alignment with its mission, vision, and values. Students develop the broad skills listed in the ILOs through all aspects of their experiences at the college: in their classes, through their use of instructional support programming, and in their interactions with student service areas.

### Cuyamaca College's ILOs

**Communication** - *Students will communicate information, arguments, and opinions effectively*

*to different audiences through various modalities, including listening, speaking, and writing.*

**Critical Thinking** - *Students will analyze and evaluate qualitative and quantitative information, and synthesize findings to make decisions within various contexts.*

**Cultural Competence** - *Students will interact effectively with others, taking into account their diverse backgrounds, and work well in cross-cultural situations.*

**Professional Responsibility** - *Students will practice ethical and civil conduct in professional environments, as well as resolve conflict and build alliances.*

When Student Services outcomes are assessed, individual service areas will identify which ILOs each outcome statements support. If the college assesses ILOs through mapping (could provide a link to what this term means?), then the assessment of discreet service area outcomes inform the overall assessment of the ILOs.

## Assessing Student Services Outcomes (SAOs and SLOs)

We encourage department deans/managers and/or department chairs/coordinators to create an Outcomes Assessment Plan that maps onto your department's comprehensive program review cycle. Student Services outcomes need to be assessed once every 4 years (minimum). One option, which this template outlines, is to assess all outcomes within 3 years and then use the year that you're writing the next comprehensive review to reflect on data and make any relevant programmatic changes. Note departments are welcome to assess individual outcome statements as frequently as is needed or desired within a 4-year window, depending on the department's assessment needs.

The following Student Services Outcomes Assessment Plan Template (provide link to external document as well) can be used as an internal document to help plan your area's assessment cycle and can be submitted with your annual and/or comprehensive program reviews as supporting documentation.

### Definition of Terms on Template

- **Assessment Method or Tool:** How you will assess your outcome statement. This can include reports, surveys, documentation of program materials, especially pre- and post-revision, or any other tool that helps you assess the outcome statement.

- **Mapped to ILOs:** This is the Institutional Learning Outcome that the outcome statement best connects to or reflects. You can select more than one.
- **Mapped to Program Review Goal:** This is the goal from your most recent or updated program review (annual or comprehensive, as applicable) that the outcome statement best connects to or reflects. You can select more than one. Often, the best outcome statements articulate measurable, assessable steps toward achieving the program review goal(s).
- **Data Collection (Specify Months):** Identifies what month(s) you will assess the outcome statement each academic year. If you plan to assess the statement more than once per year, please indicate that. If you do not plan to assess the outcome statement in a given academic year, feel free to leave it blank. Note that each outcome statement should be assessed at least once every 4 years, ideally within the comprehensive program review cycle. Feel free to add more columns to indicate more calendar years or adjust the dates if the below template is outdated.
- **Communication Plan:** Our accreditation standards increasingly emphasize the need to not only assess outcome statements, but also incorporate assessment results into meaningful program improvements. Use the last table on the below template to outline your plans for 1) communicating about your outcome statements and assessment results to your department or service area as a whole, and 2) incorporating the assessment results in a cycle of continuous program improvement. Often, service areas or departments use meetings during Flex/Professional Development week to communicate assessment results and discuss program improvements, but a best practice is to incorporate this kind of reflection more often throughout the academic year.

## Student Services Outcomes Assessment Plan Template

Student Services Area: \_\_\_\_\_

Last Comprehensive Program Review: Spring 2020

Next Comprehensive Program Review: Spring 2024

Outcome Statement	Assessment Method or Tool	Mapped to ILO(s):	Mapped to Program Review Goals	Data Collection 2021-22 (Specify Months)	Data Collection 2022-23 (Specify Months)	2023-24 (Comp. Program Review Year)
<b>Example Statement:</b> Students will create and follow a comprehensive	Degree audits and internal records	ILO 4: Professional Responsibility	Goal 1: Increase diversity of students who are	January and June	January and June	Data reflection, program modifications

education plan.			accessing program			
SLO or SAO 1: Write outcome statement here.						Data reflection, program modifications
SLO or SAO 2: Write outcome statement here.						Data reflection, program modifications
SLO or SAO 3: Write outcome statement here.						Data reflection, program modifications

### Communication Plan

<b>For each outcome statement: How will your department <u>communicate</u> outcomes assessment results to the larger group and <u>incorporate those results</u> into your service area discussions, processes, and practices.</b>	
SLO 1: Write outcome statement here.	Summarize communication and results/assessment incorporation plan here.
SLO 2: Write outcome statement here.	
SAO 1: Write outcome statement here.	
SAO 2: Write outcome statement here.
