

I have been full-time Math faculty at Cuyamaca for almost 15 years and have been serving on Academic Senate for eleven of those years. as well as serving as faculty co-chair for Instructional Program Review/Program Review Steering Committee for four years. In 2015, I was awarded both the Excellence in Teaching Award at Cuyamaca and the John & Suanne Roueche Excellence Award by the League of Innovation. I have been an important part of the Math Department's push toward acceleration, first with our pre-statistics course in 2011 and later with development of our Math Pathways program, which includes our co-requisite support courses. These programs have been instrumental components in Cuyamaca's mission to remove institutional barriers, narrow achievement gaps, and improve overall success and equity for our students. I am excited to run for the Full-Time Faculty Officer-at-Large for Instruction for the Academic Senate, and I would appreciate your vote.

Thank you

Daniel Curtis
